

Save the Rain

Your gift of a **Plastic Pond** means year-round water to irrigate crops - for healthier families and increased income!

Your Gift of Grace delivered in:

Nepal

What you give	Plastic Sheet for lining pond (farmer digs hole themselves)
Why your help is needed	<ul style="list-style-type: none"> • Mountain springs and creeks in the hills which provide water for drinking and irrigation have now started drying up • This is a new challenge for communities who are already very vulnerable to drought, extreme cold, floods, landslides, and more • The changing climate is also creating other problems - like lower yield from farming leading to lack of food for families
How your gift changes lives	Your Plastic Pond provides a reliable water source for a farmer in Nepal... ...so crops grow year round - for healthier children and healthier profits!
ALWayS for those forgotten	Through ALWS, you care for the most marginalised and vulnerable communities, including Dalit, indigenous, landless, and ethnic minorities
Your gift delivered by	LWF Nepal, together with local partners

“Don't let anyone tell you what you can or cannot do. Believe in yourself and keep pushing forward. We all have the power to change our lives. We just have to take the first step.”

Nilam Tharu, Nepal

CASE STUDY “A new beginning”

"My name is Tikaram Kami. Before we had the plastic pond, our vegetable farming was heavily dependent on the inconsistent rainfall.

Now, we have a reliable water source, and our crops are thriving.

This has not only increased our income but also provided us with fresh vegetables for our own consumption.

This support has been a game-changer for us!

We no longer worry about water shortages, and our children are eating healthier. It feels like a new beginning for our family."

How your gift grows

The great thing about your gift is it keeps on giving for many years!

Through ALWS, you support people to **keep on growing**. Along with your Plastic Pond, you also support families in Nepal with other ways to make a living, like weaving, spice production, and chicken-raising.

With your support, people make **their own decisions** about the development in their community. They have responsibility for the activities, and grow the confidence needed to become self-sufficient.

Your support **empowers people to claim their rights** from government. At the same time, you help equip those in power, so they can meet their obligations.
